We have never been healthier, happier and wealthier!

We have science, democracy, rights, education and modern medicine! We live longer!

People in Africa have mobile phones and washing machines!

We need to protect our way of life!... and get the rest of the world onboard!

everything is awesome!

I am highly educated and I can't afford housing, food or health!

Our kids won't have access to good jobs or social security!

Who is "we"? who has paid, pays and will pay the hidden costs?

who decides? in whose name? for whose benefit? how come?

We have depression, anxiety and self-harm at epidemic levels today!

The planet can't sustain unending growth and consumption!

What are we going to do with a surplus labor force? We can't eat money! We can't drink oil!
